General:

All measurements and weights are approximate - our lights are hand crafted so there will be some variation.

Made to IEC Standards designed to operate at 240V/50Hz. Certification for National Differences e.g. AS/NZS is available on request.

We recommend using only candle or golf ball style light sources in this light. We can supply suitable dimmable LED light sources.

Modifications available:

- Additional length of suspension chain to increase the maximum hanging height
- Direct-to-ceiling fixing
- Modified suspension for closer fitting to ceiling
- Certified IP44 version available (see next page).

Call us for more information on modifications.

Assembly:

Crystal chandeliers will arrive with the crystal packaged separately in strands (this is common practice and is done to prevent damage to the crystal in transit). All you need to do to assemble your light is to hook each strand onto the frame with the hooks provided.

You will need a qualified electrician to install your light.

Our lights come with comprehensive installation instructions. They shouldn't need much maintenance but we give you some information on that too.
